

Bankgirot's acquisition by P27 Nordic Payments Platform may have you wondering about the future of your e-invoicing and revenue management processes. You want them to remain undisrupted, seamless, and efficient. But you also want to keep costs in check.

This may well be an opportunity for change. Imagine a new and rich invoicing solution with flexible pricing capabilities, fee transparency, and robust reporting. What if the solution could be rapidly implemented to fulfill both your immediate and future requirements?

With SunTec BG-Invoicing Solution, you can do all this and more. Powered by the Xelerate platform, the solution comes pre-configured with products and services in the Bankgirot stack to help you quickly replace outgoing systems and meet your current invoicing needs within a couple of months, while also providing the flexibility to roll out more innovative offerings to the market over time.

The out-of-the-box solution integrates seamlessly with core systems, customer channels, and other enterprise applications to enable a speedy roll-out. You can centrally consolidate products and prices, generate e-invoices, directly debit customers, and view revenue dashboards—all without compromising on your earlier invoicing requirements met by Bankgirot. You can also extend the solution beyond invoicing to facilitate relationship-based pricing and dynamic offer management. These services, combined with automated billing, can help you transform the customer experience, and catalyze business growth.

- Rapidly fulfill your invoicing and billing needs with a robust, ready-to-use solution.
- Accelerate time-to-value by easily integrating the solution with upstream and downstream systems.
- Simplify deployment through pre-built invoicing and billing capabilities modeled on the Bankgirot stack.
- Quickly configure and adapt the solution to meet your unique invoicing needs.
- Go beyond e-invoicing services for corporate customers and enhance the customer experience by offering personalized product propositions and by enabling fee transparency.
- Improve efficiency and scale by automating the endto-end revenue management process.
- Minimize errors and disputes that arise from manual processes.

Enhance Data Management

- Easily consolidate transactions from various channels to view the associated charges in real time or in batches, using APIs or files.
- Define flexible customer billing and reporting hierarchies to address all fee consolidation needs.
- Logically group customers for invoice creation, while also maintaining a 360-degree view of customer relationships.
- Capture and consolidate the details of transaction charges, including date, time, channel, customer, account, payment, and event reference.

Manage Pricing Catalog

- Maintain a centralized catalog of chargeable items and prices.
- Automate charge collection agreements by predefining customer preferences and SLAs such as which account to charge, which currency to use for fees and invoices, and which payment and settlement methods to employ.
- Enable both customer segment level pricing and personalized pricing.
- Dynamically price customers based on the details of their transactions, including date, time, channel, customer, account, payment reference, and event reference.
- Re-price transaction events for customers as needed based on parameters such as their overall usage of products and services, as well as recurring or subscription charges at different levels of relationship hierarchies.
- Use suspense management capabilities to keep a record of all transaction-related events defined or undefined, charged, or uncharged and take necessary actions to prevent revenue leakage.

Enable Rapid and Flexible Invoicing

- Manage and automate the end-to-end invoicing process, including but not limited to preinvoicing, review and approval, related tax computations, post-invoicing, and dispute management.
- Enable both scheduled and on-demand invoicing.
- Utilize different invoice formats, including PDF, elnvoice and CAMT.086, customizable invoice templates, and custom fields to present the invoice back to the customer.
- Use multi-language and multi-currency capabilities to specify charges.
- Enable email invoicing.

Handle Payments and Settlements

- Enable flexible payment options, including direct debit and request-to-pay.
- Conduct an invoice aging analysis, and trigger timely follow-ups, including reminders and penalties.

Analyze Data

- Enable "shadow pricing" to track personalized and contextualized prices vis-à-vis standard prices. Analyze related gains and losses.
- Derive and extract valuable financial and performance insights from revenue and profitability dashboards.

Our SaaS Philosophy

At SunTec, we know that accelerating digitization and adopting contemporary business practices are becoming critical for banks to meet their customers' ever-evolving needs. Business agility has never been more important than it is today! SunTec SaaS solutions, powered by Xelerate, are therefore designed to ensure easy deployment and enable rapid time-to-market to prioritize banks' customer engagement, revenue management, and compliance strategies. These solutions are designed for banks, who are looking to expedite their digital transformation journeys.

About SunTec

SunTec is the world's No. 1 pricing and billing company that creates value for enterprises through its Cloud-based products. More than 130 clients in 45+ countries rely on SunTec to provide hyper-personalized products, offers, pricing, loyalty programs, tax compliance, and billing for over 400 million end-customers. SunTec products are based on our cloud-native and cloud-agnostic, API first, micro-services-based proprietary platform, Xelerate and are delivered on-premise, on private cloud and as SaaS. SunTec has global operations including the USA, UK, Germany, UAE, Singapore, Canada, Australia, and India.
