

SunTec®

SunTec Xelerate E-Invoicing

Streamline Compliance.
Scale with Confidence.

www.suntecgroup.com

Governments around the world are rapidly embracing e-invoicing as a strategic lever to modernize tax systems, curb fraud, and drive economic efficiency. E-invoicing not only eliminates manual errors and paper trails but also integrates seamlessly with broader digital ecosystems, accelerating compliance, reducing administrative burden, and unlocking cost savings. As global adoption accelerates, e-invoicing is no longer a regulatory checkbox; it's a cornerstone of smarter, more transparent economies.

It is in this context that SunTec built its product to address this market need. SunTec Xelerate E-Invoicing is architected for agility, **adapting effortlessly across industries**. The product turns compliance into a catalyst for streamlined operations and fiscal transparency. It manages **end-to-end e-invoice processing** - from compliance, validation to secure transmission. By **decoupling data preprocessing from access point routing**, it empowers enterprises to maintain comprehensive control over sensitive data, bolster security, and streamline compliance across jurisdictions.

Built on SunTec's 30+ years of expertise in pricing, billing, and taxation, the product integrates seamlessly into your existing IT ecosystem - whether you operate in one country or across continents. With built-in support for country-specific mandates, Peppol frameworks, and indirect tax regimes like VAT and GST, SunTec empowers enterprises to adapt with speed and accuracy.

Why SunTec Xelerate?

Open Peppol Certified
and a certified access point
service provider

SunTecTM
xelerate

Prior experience
deploying e-invoicing
products in highly
regulated industries like
banking

Supports global compliance
models - 3-corner (direct tax
authority), 4/5-corner Peppol,
and hybrid/country
specific models

Key Capabilities Overview

CAPABILITY	E-INVOICING PROCESSING	ACCESS POINT
 Data Capture & Integration	• Ingests data via REST APIs, message queues, DB staging, or SFTP – real-time or batch invoice retrieval • Pre-built adapters for SAP, Oracle, Microsoft Dynamics • Extensible connector framework handles schema/channel changes without code rewrites	• Direct ERP integration with plug-and-play connectors • Zero-code onboarding and out-of-the-box ERP connectors • Supports callback APIs, message queues, batch feeds, and DB staging • Multi-protocol support with high-availability ingestion
 Data Validation & Enrichment	• Validates mandatory fields, cross-field logic (e.g., credit-note linkage, formatting rules) • Auto-fills missing fields using master records	• Rules-driven validation engine with automated error routing • Manual reprocessing tools and centralized error code management • Proactive exception handling, configurable retry logic, and multi-language support
 E-Document Generation & Formatting	• Generates XML/JSON-based e-invoices, credit notes, debit notes • Adds UUIDs, QR codes, invoice hashes • Applies digital signatures and jurisdiction-specific security protocols	• Dynamic schema resolution with multi-country, multi-format support • Automated SBDH generation and version management • Flexible doc generation (invoice, credit note, tax details), multi-country templates • Generates e-invoice documents to meet Peppol BIS, PINT, and local standards, including SBDH with digital signatures, with end-to-end encryption

CAPABILITY

E-INVOICING PROCESSING

ACCESS POINT

Reporting & Exchange

- Supports 3-corner and Peppol (4-/5-corner) models via accredited Access Points
- Handles cancellations, retries, and status updates

- Automated SML/SMP lookup and real-time endpoint discovery
- Robust inbound message handling and seamless client status integration
- Intelligent status mapping, customizable alerts, and multi-channel notifications

PDF Issuance & Delivery

- Generates secure, template-based PDFs (PDF/A-3, watermarking, password protection)
- Auto-email delivery and secure REST API access for on-demand PDFs

Security & Compliance

- OAuth2/API key authentication, encryption, certificate management
- Tamper-proof, timestamped records and audit trails of every transaction

- Secure, scalable APIs with enterprise-grade security standards
- End-to-end encryption, automated decryption/decoding
- Standards-based AS4 messaging with signatures and attachments

API Management

- Key-based and OAuth2 authentication, certificate management, and encrypted communication across endpoints

CAPABILITY

E-INVOICING PROCESSING

ACCESS POINT

**Monitoring,
Dashboards &
Alerts**

- Role-based dashboards, drill-down analytics, PDF/Excel reports
- Real-time compliance alerts via email/SMS

- Real-time, role-based dashboards with SLA tracking
- Interactive views, flexible data access, bulk export, custom reports
- Live tracking, status updates, and multi-channel alerts (email, SMS, Teams/Slack) on every document journey

**Error
Management &
Processing**

- Auto/manual resolution of system/functional errors
- Flexible retry logic with auto-resubmission

- Manual and automated cancellation workflows

**Audit Trails &
Records**

- Full transaction and user activity logs

- Immutable, compliant storage with configurable retention
- Policy-driven data retention and tamper-proof logs

Key Benefits of SunTec Xelerate E-Invoicing

FAST AND COST-EFFICIENT IMPLEMENTATION:

Rapid deployment with reduced implementation and integration costs

SEAMLESS INTEGRATION:

Minimal customization effort; supports hybrid IT landscapes and lowers integration complexity

OPERATIONAL EFFICIENCY:

Eliminates manual processes, enhances automation, and accelerates compliance

GUARANTEED CONTINUITY AND COMPLIANCE:

Ensures uninterrupted, compliant operations with minimal human intervention

DATA PRIVACY AND INTEGRITY:

Maintains secure, tamper-proof invoicing – essential for compliance and trust

BUSINESS ENABLEMENT:

Facilitates global trade, empowers data-driven decisions, and enables analytics and business intelligence

ENHANCED TRANSPARENCY:

Improves visibility across invoicing workflows for better governance and control

HOLISTIC VISIBILITY:

Equips Finance, Tax, and IT teams to monitor performance, diagnose issues, and optimize invoicing flows

Enterprise-ready. Industry-agnostic. Future-focused.

Whether you're digitizing invoicing or preparing for the next wave of regulatory change, SunTec Xelerate E-Invoicing gives you the power to move fast, without compromise.

Our product is purpose-built for businesses navigating regulatory complexity while striving for operational efficiency and transformation. From seamless ERP integration to certified access points and multi-country readiness, we deliver compliance and control in equal measure.

Let's Talk.
